Professional Summary

Third-year Electronics and Communication Engineering student at SVNIT Surat with experience in full-stack development, scalable backend systems, and AI-powered applications. Built production-grade platforms including AR-enabled restaurant systems, AI-driven image processing applications, and event management systems using React.js, Node.js, MongoDB, and cloud technologies.

Education

National Institute of Technology, Surat Surat, India
B.Tech in Electronics and Communication Engineering Aug 2024 – May 2028
Relevant Coursework: DSA, DBMS, Operating Systems, OOPs

Kiran Bal Vidya Mandir School Class XII – 85%

Watika Vidyapeeth School Class X – 88%

Technical Skills

- **Languages:** C++, JavaScript, Python, HTML5, CSS3
- **Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, Flask, REST APIs
- **Databases:** MongoDB, PostgreSQL, MySQL
- **Cloud & DevOps:** AWS (EC2, S3, RDS), Docker, Jenkins, CI/CD
- **Tools:** Git, GitHub, Postman, Cloudinary

Professional Experience

Web Developer Intern – The Avasar Initiative 2026

Engineered and maintained a scalable EdTech platform using React.js and Node.js with dedicated student and admin portals. Implemented secure Cloudflare R2 video infrastructure using presigned URL architecture and role-based access control. Optimized application performance through lazy loading, caching, and responsive UI enhancements.

GitHub

Web Developer – Menuura 2025

Built an AR-enabled Restaurant POS platform integrating 3D menu visualization, billing, and order management using React.js and Spring Boot. Developed scalable REST APIs and responsive frontend interfaces for restaurant operations. Collaborated with 100+ cafes and restaurants to validate real-world operational requirements.

Projects

3D AR-Based POS System (Menuura) Nov 2025

Developed an AR-enabled restaurant POS system integrating interactive 3D food visualization and digital billing functionalities. Improved customer engagement and ordering confidence through immersive AR-based food previews while maintaining scalable and responsive system architecture.

Tech Stack: React.js, Three.js, Node.js, Express.js, MongoDB, Blender

GitHub

AI Photo Scan System Dec 2025

Built an AI-powered facial recognition platform for automated event photo matching and retrieval. Reduced image upload latency using browser-side compression techniques and scalable backend workflows for efficient real-time image processing.

Tech Stack: TypeScript, Node.js, MongoDB, Face API, Hugging Face AI

GitHub

WELLNESS CLUB SVNIT Feb 2026

Built a full-stack Wellness Club Event Management System using React.js, Node.js, Express.js, MongoDB, JWT, and Cloudinary. Implemented email automation, analytics dashboards, certificate generation, and admin management using Nodemailer, Node-Cron, and RESTful APIs.

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary

Achievements & Certifications

- JEE Main 2024: Top 1% candidate with 99.26 percentile in Mathematics
- Smart India Hackathon (SIH) 2025 – Shortlisted
- Deloitte Technology Job Simulation – Forage (Certificate)
- JPMorgan Chase Software Engineering Simulation – Forage (Certificate)
- The Avasar Initiative Internship Certificate & LOR (Certificate) — (LOR)
