Profile

Software developer focused on building full-stack web applications, backend services, RESTful APIs, and AI-powered systems. Electronics and Communication Engineering undergraduate at SVNIT with hands-on experience in React.js, Node.js, Express.js, databases, authentication, cloud infrastructure, API integration, and performance optimization. Seeking Software Development Internship and SDE roles.

Education

Sardar Vallabhbhai National Institute of Technology (SVNIT) Surat, India
B.Tech. in Electronics and Communication Engineering *Aug 2024 – May 2028*

- **Relevant Coursework:** Data Structures and Algorithms, Database Management Systems, Operating Systems, Object-Oriented Programming

Experience

The Avasar Initiative 2026
Web Developer Intern *On-site*

- Developed and maintained a scalable **EdTech platform** using React.js and Node.js with dedicated student and admin workflows.
- Implemented secure video delivery using **Cloudflare R2, presigned URLs, and role-based access control** to protect course content.
- Improved frontend performance through **lazy loading, caching, responsive UI design**, and optimized API interactions.
- Collaborated using Git/GitHub and contributed to production-oriented software development workflows.

Projects

3D AR-Based Restaurant POS System GitHub
React.js, Three.js, Node.js, Express.js, MongoDB, Blender, Tailwind CSS

- Built an **AR-enabled restaurant POS system** with interactive 3D food visualization, digital menu, ordering, and billing workflows.
- Developed RESTful backend APIs using **Node.js, Express.js, and MongoDB** for menu, order, and restaurant data management.
- Integrated **Three.js and Blender** to create and render interactive 3D food assets with a responsive React.js frontend.

AI Photo Scan System GitHub
React.js, Node.js, Python, MongoDB, face-api.js, Hugging Face, Cloudinary, Cloudflare

- Developed an **AI-powered facial recognition platform** that matches uploaded faces with event photographs for automated photo retrieval.
- Implemented image-processing workflows and backend APIs using **React.js, Node.js, and MongoDB**.
- Optimized browser-side image compression to reduce upload size and improve overall processing performance.

Wellness Club SVNIT – Event Management System Demo GitHub
React.js, Node.js, Express.js, MongoDB, JWT, Cloudinary, Resend

- Built a full-stack **event management platform** with user registration, event workflows, admin controls, and analytics dashboards.
- Implemented **JWT-based authentication and authorization** with RESTful APIs for secure user and administrative operations.
- Integrated **Cloudinary** for media management and automated certificate generation and email notifications using Node.js services.

Technical Skills

Languages: C++, JavaScript, Python, HTML5, CSS3
Frontend: React.js, EJS, Tailwind CSS, Bootstrap, Three.js
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL, PostgreSQL, Neon
AI/ML: Hugging Face, face-api.js
Cloud & DevOps: AWS (EC2, S3), Docker, Kubernetes, Cloudflare R2, CI/CD
Tools: Git, GitHub, Postman, Cloudinary, Jira
Core Coursework: Software Engineering, Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Data Communication and Networking

Achievements

- **Smart India Hackathon 2025:** Shortlisted for the national-level hackathon.
- **Adobe University Hackathon 2026:** Qualified for Round 2.
- **JEE Main 2024:** Achieved 99.26 percentile in Mathematics, placing among the top 1% candidates.
- **The Avasar Initiative:** Completed Web Developer Internship; Completion Certificate and LOR.
- **Deloitte Technology Job Simulation:** Completed through Forage; Certificate.
- **JPMorgan Chase Software Engineering Job Simulation:** Completed through Forage; Certificate.
